<p>PARENT PRE-SCREENING</p>	<p>[Screen shown by Nielsen] <i>UNIVERSE: Respondents who indicated they had a child between the ages of 10-17 living in the household.</i> PROGRAMMER NOTE: UK and USA: If the quotas for a particular age category (10-13 or 14-17) are full for both male and female categories, insert open age categories in text below. You indicated that you have a child in the household between the ages of 10 and 17 [10 and 13 / 14 and 17]. After a few more questions for you, we would like to have your child complete a survey, if they qualify. Would you be willing to let your child participate? Please note that your child does not need to be available right now to participate. After you complete the questions for parents/guardians, instructions will be provided for having your child participate when they are available.</p> <p>Yes → [REDIRECT PANELIST TO SURVEY IN ALCHEMER] No → Thank you for your time. <p>PARENT INFO / CONSENT</p> <p>REVISED 2020</p> <p>COUNTRY SPECIFIC WORDING</p>	<p>PROGRAMMER NOTE: Insert 10-13 or 14-17 in wording below if one set of age quotas is full (i.e., for both males and females): We would like to conduct a survey with ONE of your CHILDREN AGED 10-17 [10-13 / 14-17].</p> <p>Please read the following information, and indicate if you are willing to let your child participate.</p> <ul style="list-style-type: none"> - The survey will examine eating patterns among children. Your child will be asked about the types of food they eat, advertisements they may have seen for food, the impact of the COVID-19 pandemic on their eating patterns, and their background (e.g., age, weight, smoking, cannabis or alcohol use). - Similar surveys are being completed in 5 other countries, so researchers can learn about the types of food children eat and advertisements children see in different parts of the world. - The study is being conducted by Professor David Hammond at the University of Waterloo, Canada.

- The survey will take about 20 minutes.
- As a thank you for your child’s participation, the survey firm will provide you with your usual compensation.
- We will ask your child a few short questions to see if they are eligible to complete the survey. All other questions are completely voluntary. Your child can withdraw participation at any time, and any data already collected will be deleted by the researcher. There are no known or anticipated risks to your child’s participation in the survey.
- We take your child’s privacy very seriously and will keep their identity confidential. We will never share their personal information with any company or marketing firm. All of the information your child provides will be grouped with responses from other participants, which means that there will be no way to identify participants individually from the reports we create. Your child will not be asked to provide their name, address or telephone number.
- The study data will be collected using Alchemer software. Internet protocol (IP) addresses may be recorded by the software program used for this study, but this information will not be used by the researchers or the owners of the program with an intention to identify you or your child. Please note that while we implement security safeguards designed to protect all survey data, when information is transmitted over the internet, there is still a risk your child’s responses may be intercepted by a third party (e.g., government agencies, hackers).
- The data will be stored for a minimum of 7 years on a secure University of Waterloo server in Canada. Analyses may also be conducted by international research team members, but only using de-identified data stored on password-protected computers.
- The questions you have answered up to this point are for the survey firm, and will not be shared with the researchers.
- This project has been reviewed and received ethics clearance through a University of Waterloo Research Ethics Committee (ORE# 41477). However, the final decision about participation is yours and your child’s. If you have questions for the Committee, please contact the Office of Research Ethics in Canada at 001-519-888-4567 ext. 36005 or ore-ceo@uwaterloo.ca.
- For all other questions about the study, please contact Professor David Hammond of the University of Waterloo in Canada at 001-519-888-4567 ext. 46462 or dhammond@uwaterloo.ca or Dr. Jean Adams, a local study researcher from the University of Cambridge in the United Kingdom at 01223 769142 or jma79@medschl.cam.ac.uk.

Please note that your child does not need to be available right now to participate. After you complete the questions for parents/guardians, instructions will be provided for having your child participate when they are available.

By providing your consent, you are not waiving your legal rights or releasing the investigator(s) or involved institution(s) from their legal and professional responsibilities.

Would you be willing to allow your child to participate in this survey?

By clicking “Yes” below, you confirm that you are the parent/legal guardian of the child participating in this study and agree to allow them to participate.
