

# CANADA SURVEY

2025 SURVEY (WAVE 9)

DECEMBER 16, 2025

### ACKNOWLEDGEMENTS

FUNDING FOR THE INTERNATIONAL FOOD POLICY STUDY WAS PROVIDED BY A CANADIAN INSTITUTES OF HEALTH RESEARCH (CIHR) PROJECT GRANT (PJT-162167), WITH ADDITIONAL SUPPORT FOR THE ADULT SURVEY FROM THE NATIONAL INSTITUTE OF DIABETES AND DIGESTIVE AND KIDNEY DISORDERS OF THE NATIONAL INSTITUTES OF HEALTH (R01 DK128967). THE CONTENT IS SOLELY THE RESPONSIBILITY OF THE AUTHORS AND DOES NOT NECESSARILY REPRESENT THE OFFICIAL VIEWS OF THE CANADIAN INSTITUTES FOR HEALTH RESEARCH, OR THE NATIONAL INSTITUTES OF HEALTH. THE STUDY HAS NO AFFILIATIONS WITH THE FOOD INDUSTRY AND THERE ARE NO CONFLICTS OF INTERESTS TO DECLARE.

ADAPTED FROM  
SEVERAL OTHER  
PAPER FFQS FOR  
BEVERAGES.

REVISED 2019  
REVISED 2023 (milk)  
REVISED 2025 (FR)

BFQ\_#\_SIZE\_CAN  
BFQ\_#\_SIZE\_DK\_CAN  
BFQ\_#\_SIZE\_R\_CAN

*UNIVERSE: Respondents randomized to the original Beverage Frequency Questionnaire*  
[PROGRAMMER NOTE: For each category that there was at least one drink consumed, ask size question - images should only be shown for beverage categories selected above. Show each category on a separate page with the question header.]

**For each type of drink, what size did you USUALLY have?**

If you had different sizes, select the picture that is closest to the average size.

Regular soda or pop (Coke, Pepsi, 7-Up, Sprite, root beer, etc.) \*NOT including diet pop

Diet soda or pop (Diet Pepsi, Coke Zero, etc.)

*UNIVERSE: Respondents randomized to the original Beverage Frequency Questionnaire*  
[PROGRAMMER NOTE: For each category that there was at least one drink consumed, ask size question - images should only be shown for beverage categories selected above. Show each category on a separate page with the question header.]

**À l'égard de chaque type de boisson, combien en consommez-vous HABITUELLEMENT ?**

Si vous en avez consommé différentes quantités, veuillez sélectionner l'image qui se rapproche le plus de la quantité que vous consommez en moyenne.

Boisson gazeuse ordinaire (Coke, Pepsi, 7-up, Sprite, racinette, etc.) \*EN EXCLUANT les boissons-diète

Boissons diètes (Pepsi Diète, Coca-Cola Zero, etc.)

## 100% fruit or vegetable juices (orange juice, apple juice, etc.)

|                                                                                   |                                                                                   |                                                                                   |                                                                                   |                                                                                    |

UNIVERSE: Selected “Yes” for ‘100% fruit or vegetable juice’ in last 7 days.

### 100% FRUIT OR VEGETABLE JUICE

(like orange juice, apple juice)

UNIVERSE: Selected “Some...” or “All...” for ‘Diet/low cal fruit drinks’ in last 7 days.

### DIET, LOW-CALORIE OR NO-CALORIE FRUIT DRINK

(like diet lemonade, diet cranberry juice, unsweetened iced tea)

UNIVERSE: Selected “None” or “Some...” for ‘Diet/low cal fruit drinks’ in last 7 days.

### SWEETENED FRUIT DRINK

(like lemonade, fruit punch/cocktail, SunnyD, iced tea, flavoured/vitamin waters)

UNIVERSE: Selected “Yes” for ‘Tap water’ in last 7 days.

### TAP WATER

(including from a filter or water cooler)

UNIVERSE: Selected “Yes” for ‘100% fruit or vegetable juice’ in last 7 days.

### JUS DE FRUITS OU DE LÉGUMES PURS

(comme jus d’orange, de pomme)

UNIVERSE: Selected “Some...” or “All...” for ‘Diet/low cal fruit drinks’ in last 7 days.

### BOISSONS AUX FRUITS ALLÉGÉES, HYPOCALORIQUES OU SANS CALORIES

(comme la limonade hypocalorique, le jus de canneberge allégé, le thé glacé non sucré)

UNIVERSE: Selected “None” or “Some...” for ‘Diet/low cal fruit drinks’ in last 7 days.

### BOISSONS AUX FRUITS SUCRÉES

(comme limonade, punch / cocktail aux fruits, SunnyD, thé glacé, eaux aromatisées/vitaminées)

UNIVERSE: Selected “Yes” for ‘Tap water’ in last 7 days.

### EAU DU ROBINET

(y compris celle provenant d’un filtre ou d’une fontaine d’eau)

UNIVERSE: Selected "Yes" for 'Plain bottled water' in last 7 days.

### PLAIN BOTTLED WATER

UNIVERSE: Selected "Yes" for 'Carbonated or sparkling water' in last 7 days.

### CARBONATED OR SPARKLING WATER (LOW OR NO-CALORIE) (like Bubly, Perrier)

UNIVERSE: Selected "Some..." or "All..." for 'Diet/low cal sports drinks' in last 7 days.

### DIET, LOW-CALORIE OR NO-CALORIE SPORTS DRINK (like G2, Powerade Zero)

UNIVERSE: Selected "None" or "Some..." for 'Diet/low cal sports drinks' in last 7 days.

### REGULAR SPORTS DRINK (like Gatorade, Powerade)

UNIVERSE: Selected "Some..." or "All..." for 'Diet/low cal energy drinks' in last 7 days.

### DIET, LOW-CALORIE OR NO-CALORIE ENERGY DRINK (like Red Bull Sugarfree, Celsius)

UNIVERSE: Selected "Yes" for 'Plain bottled water' in last 7 days.

### EAU EMBOUEILLÉE NON AROMATISÉE

UNIVERSE: Selected "Yes" for 'Carbonated or sparkling water' in last 7 days.

### EAU GAZEUSE OU PÉTILLANTE (FAIBLE EN CALORIES OU HYPOCALORIQUES) (comme Bubly, Perrier)

UNIVERSE: Selected "Some..." or "All..." for 'Diet/low cal sports drinks' in last 7 days.

### BOISSONS POUR SPORTIFS ALLÉGÉES, HYPOCALORIQUES OU SANS CALORIES (comme G2, Powerade Zero)

UNIVERSE: Selected "None" or "Some..." for 'Diet/low cal sports drinks' in last 7 days.

### BOISSONS POUR SPORTIFS ORDINAIRES (comme Gatorade, Powerade)

UNIVERSE: Selected "Some..." or "All..." for 'Diet/low cal energy drinks' in last 7 days.

### BOISSONS ÉNERGISANTES ALLÉGÉES, HYPOCALORIQUES OU SANS CALORIES (comme Red Bull Sugarfree, Celsius)

UNIVERSE: Selected “None” or “Some...” for ‘Diet/low cal energy drinks’ in last 7 days.

### REGULAR ENERGY DRINK

(like Red Bull, Rockstar, Monster)

UNIVERSE: Selected “Yes” for ‘White milk or alternatives’ in last 7 days.

### WHITE MILK OR ALTERNATIVES

(like unsweetened soy or almond milk)

\*Don’t include milk in cereal, coffee or tea.

UNIVERSE: Selected “Yes” for ‘Chocolate or flavoured milk’ in last 7 days.

### CHOCOLATE OR FLAVOURED MILK OR ALTERNATIVES

(like sweetened soy or almond milk)

UNIVERSE: Selected “Yes” for ‘Coffee or tea’ in last 7 days.

### COFFEE OR TEA

UNIVERSE: Selected “Yes” for ‘Sweetened specialty coffee or tea’ in last 7 days.

### SWEETENED SPECIALTY COFFEE OR TEA

(like mochas, frappuccinos, chai lattes, iced coffees, bubble tea)

UNIVERSE: Selected “None” or “Some...” for ‘Diet/low cal energy drinks’ in last 7 days.

### BOISSONS ÉNERGISANTES ORDINAIRES

(comme Red Bull, Rockstar, Monster)

UNIVERSE: Selected “Yes” for ‘White milk’ in last 7 days.

### LAIT OU SUBSTITUTS DE LAIT NON AROMATISÉ

(comme le lait de soya ou d’amande non sucré)

\*Ne pas inclure le lait dans les céréales, le café ou le thé.

UNIVERSE: Selected “Yes” for ‘Chocolate or flavoured milk’ in last 7 days.

### LAIT AU CHOCOLAT OU LAIT AROMATISÉ OU SUBSTITUTS DE LAIT AROMATISÉ

(comme le lait de soya ou d’amande sucré)

UNIVERSE: Selected “Yes” for ‘Coffee or tea’ in last 7 days.

### CAFÉ OU THÉ

UNIVERSE: Selected “Yes” for ‘Sweetened specialty coffee or tea’ in last 7 days.

### CAFÉ OU THÉ DE SPÉCIALITÉ SUCRÉ

(comme moka, frappuccinos, lattés chai, cafés glacés, thé aux perles)

UNIVERSE: Selected “Some...” or “All...” for ‘Unsweetened/diet smoothies/protein shakes/yogurt’ in last 7 days.

### UNSWEETENED, DIET OR LOW-CALORIE SMOOTHIES, PROTEIN SHAKES, OR DRINKABLE YOGURT

(like low-sugar protein shakes, low-sugar drinkable yogurt)

UNIVERSE: Selected “None” or “Some...” for ‘Unsweetened/diet smoothies/protein shakes/yogurt’ in last 7 days.

### SWEETENED SMOOTHIES, PROTEIN SHAKES, OR DRINKABLE YOGURT

UNIVERSE: Selected “Yes” for ‘Beer’ in last 7 days.

### BEER

UNIVERSE: Selected “Yes” for ‘Wine’ in last 7 days.

### WINE

UNIVERSE: Selected “Yes” for ‘Cider’ in last 7 days.

### CIDER (ALCOHOLIC)

UNIVERSE: Selected “Some...” or “All...” for ‘Unsweetened/diet smoothies/protein shakes/yogurt’ in last 7 days.

### SMOOTHIES, BOISSONS PROTÉINÉES, OU YOGOURT À BOIRE NON SUCRÉS, ALLÉGÉS OU HYPOCALORIQUES

(comme les boissons protéinées à faible teneur en sucre, les yogourts à boire à faible teneur en sucre)

UNIVERSE: Selected “None” or “Some...” for ‘Unsweetened/diet smoothies/protein shakes/yogurt’ in last 7 days.

### SMOOTHIES, BOISSONS PROTÉINÉES, OU YOGOURT À BOIRE SUCRÉS

UNIVERSE: Selected “Yes” for ‘Beer’ in last 7 days.

### BIÈRE

UNIVERSE: Selected “Yes” for ‘Wine’ in last 7 days.

### VIN

UNIVERSE: Selected “Yes” for ‘Cider’ in last 7 days.

### CIDRE (ALCOOLISÉ)

UNIVERSE: Selected “Some...” or “All...” for ‘Diet/low cal mixed drinks’ in last 7 days.

**DIET OR LOW-CALORIE MIXED DRINKS, COOLERS, HARD SELTZERS, OR COCKTAILS**

(like vodka & soda, rum & diet coke, White Claw, other sugar-free cocktails or seltzers)

UNIVERSE: Selected “None” or “Some...” for ‘Diet/low cal mixed drinks’ in last 7 days.

**SUGARY MIXED DRINKS, COOLERS, HARD SELTZERS, OR COCKTAILS**

(like rum & coke, Smirnoff Ice, Twisted Tea, gin & tonic, margaritas)

UNIVERSE: Selected “Yes” for ‘Hard alcohol with no mix’ in last 7 days.

**HARD ALCOHOL WITH NO MIX**

UNIVERSE: Selected “Yes” for ‘Non-alcoholic beer/wine/spirits/mocktails’ in last 7 days.

**NON-ALCOHOLIC BEER, WINE, SPIRITS OR MOCKTAILS**

UNIVERSE: Selected “Some...” or “All...” for ‘Diet/low cal premixes’ in last 7 days.

**SPIRITUEUX AVEC AUTRE BOISSON, COOLERS, HARD SELTZERS OU COCKTAILS ALLÉGÉES OU HYPOCALORIQUES**

(comme vodka et soda, rhum et boisson diète, White Claw, autres cocktails ou seltzers sans sucre)

UNIVERSE: Selected “None” or “Some...” for ‘Diet/low cal mixed drinks’ in last 7 days.

**SPIRITUEUX AVEC AUTRE BOISSON, COOLERS, HARD SELTZERS OU COCKTAILS SUCRÉS**

(comme rhum et coca, Smirnoff Ice, Twisted Tea, gin tonic, margaritas)

UNIVERSE: Selected “Yes” for ‘Hard alcohol with no mix’ in last 7 days.

**SPIRITUEUX SANS AUTRE BOISSON**

UNIVERSE: Selected “Yes” for ‘Non-alcoholic beer/wine/spirits/mocktails’ in last 7 days.

**BIÈRE, VIN, SPIRITUEUX OU COCKTAILS SANS ALCOOL**

**POP ACCEPTABLE  
FREQUENCY FOR  
CHILDREN**

REVISED 2025 (CAN)

SSB\_CHILD\_POP

Imagine that you have a 10-year old child. Is it okay for them to have this type of drink...

500 mL

- Never
- Once per month
- A few times per month
- Once per week
- A few times per week
- Once per day
- As often as they would like
- Don't know
- Refuse to answer

Imaginez que vous avez une ou un enfant de 10 ans. Croyez-vous qu'il est acceptable pour lui ou elle de consommer ce type de boisson...

500 mL

- Jamais
- Une fois par mois
- Quelquefois par mois
- Une fois par semaine
- Quelquefois par semaine
- Une fois par jour
- Aussi souvent que vous le souhaitez
- Je ne sais pas
- Je refuse de répondre

Summary of revisions:  
2019 corrected error in chicken breast NFT from 2018 (29 g protein not 0g); and replaced deli ham with deli chicken. 2020 updated NFT format; deleted “Quaker” from oats ingredient list; added fish products. 2022 added sugar to applesauce ingredients; increased sodium in tuna. 2023 deleted 7 products (applesauce, cereal, cheese, deli meat, all 3 fish products). 2025 added High In warnings in Canada. Refer to the User Guide for further information.

[PROGRAMMER NOTE: Randomize order of 8 food products, and record order of randomization. Prevent respondents from using back button to return to previous questions in set. Show scale horizontally on computer browsers, and vertically on smartphone and tablet browsers.]

**Overall, how healthy is this food product?**

Please answer on a scale from 0 to 10, where 0 = Not at all healthy, and 10 = Extremely healthy.

    |
| Per 1 cup (250 mL)                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                 |  |                    |  |                     |                |           |     |                 |     |             |     |           |     |             |      |                    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                 |  |                    |  |                     |                |           |     |                 |     |             |     |           |     |             |      |                    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                 |  |                    |  |                     |                |           |     |                 |     |             |     |           |     |             |      |                    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                 |  |                    |  |                     |                |           |     |                 |     |             |     |           |     |             |      |                    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                 |  |                    |  |                     |                |           |     |                 |     |             |     |           |     |             |      |                    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                 |  |                    |  |                     |                |           |     |                 |     |             |     |           |     |             |      |                    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                 |  |                    |  |                     |                |           |     |                 |     |             |     |           |     |             |      |                    |  |     |
| <b>Ingredients:</b> Milk, Cheddar cheese (milk, cheese culture, salt, enzymes), Whey, Milk protein concentrate, Maltodextrin, Sodium citrate. Contains less than 2% of Calcium phosphate, Modified food starch, Whey protein concentrate, Salt, Lactic acid, Annatto and paprika extract (color), Natamycin (a natural mold inhibitor), Enzymes, Cheese culture, Vitamin D3.                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                 |  |                    |  |                     |                |           |     |                 |     |             |     |           |     |             |      |                    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                 |  |                    |  |                     |                |           |     |                 |     |             |     |           |     |             |      |                    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                 |  |                    |  |                     |                |           |     |                 |     |             |     |           |     |             |      |                    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                 |  |                    |  |                     |                |           |     |                 |     |             |     |           |     |             |      |                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                 |  |                    |  |                     |                |           |     |                 |     |             |     |           |     |             |      |                    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                 |  |                    |  |                     |                |           |     |                 |     |             |     |           |     |             |      |                    |  |
