Your child will be asked about the types of food they eat, advertisements they may have seen for food and other products, and their background (e.g., age, weight, smoking, cannabis or alcohol use). - Similar surveys are being completed in 5 other countries, so researchers can learn about the types of food children eat and advertisements they see in different parts of the world. - The study is being conducted by Professor David Hammond at the University of Waterloo, Canada. - The survey will take about 20 minutes. - As a thank you for your child’s participation, the survey firm will provide you with your usual compensation. - We will ask your child a few short questions to see if they are eligible to complete the survey. All other questions are completely voluntary. Your child can click ‘refuse to answer’ to any question they do not wish to answer, and you will still receive the reward. Your child can choose to stop participating at any time, but if they close the survey before the end of the survey you will not receive the reward, and any data already collected will be deleted by the researcher. There are no known or anticipated risks to your child’s participation in the survey. | <p>Nos gustaría realizar una encuesta con UNO de sus HIJOS/AS DE 10 A 17 AÑOS.</p> <p>Por favor lea la siguiente información e indique si está dispuesto a dejar que su hijo/a participe.</p> <ul style="list-style-type: none"> - La encuesta examinará los patrones de alimentación de los niños/as. We will never share their personal information with any company or marketing firm. All of the information your child provides will be grouped with responses from other participants, which means that there will be no way to identify participants individually from the reports we create. Your child will not be asked to provide their name, address or telephone number. - The study data will be collected using Alchemer software. Internet protocol (IP) addresses may be recorded by the software program used for this study to avoid duplicate responses in the dataset, but this information will not be used by the researchers or the owners of the program to identify you or your child personally. Please note that while we implement security safeguards designed to protect all survey data, when information is transmitted over the internet, there is still a risk your child’s responses may be intercepted by a third party (e.g., government agencies, hackers). - The data will be stored for a minimum of 7 years on a secure University of Waterloo server in Canada. Analyses may also be conducted by international research team members, but only using de-identified data stored on password-protected computers. - The questions you have answered up to this point are for the survey firm, and will not be shared with the researchers. - This project has been reviewed and received ethics clearance through the Ethical-Scientific Committee of the Instituto de Nutrición y Tecnología de los Alimentos (INTA) of the University of Chile.
